# Woodpark Poll Stud Sires

## ALL SIRES FROM WOODPARK POLL EWES

SIRE GROUP (EWES)	SIRE	COMMENT
Elite ewes AI	15 - 106	Big bodied. Big square from elite white wool son of proven sire 12-342.
Elite ewes AI	12-342	Big carcass ram with superb quality wool.
Elite ewes AI	15-352	Progeny measured as the heaviest fleece weight group. Heavy good looked quality wool, son of 13-594
Elite ewes AI	14-204	Long Bodied, heavy fleece weight ram, well-nourished wool
Elite ewes AI	12-407	Big square, heavy boned. White high yielding wool cutter
Elite ewes AI	15-397	Son of 13-594, thick set and heavy wool
Elite ewes AI	15-1273	Big square frame, great hindquarter
Elite ewes AI	CP 407 418	Centre Plus Ram, son of Woodpark 12-407. High fleece-weight, deep barrel ram
Elite ewes AI	JCS 15-017	Excellent length body, great structure
Elite ewes	10-015	Quality white wool

### EWES - CLASSED INTO PERFORMANCE GROUPS

Based on their physical production data and genetic potential through ASBVs  
 The Elites are heavier BWT, heavier FLC weights and finer in micron than the doubles and the doubles likewise to the singles.

# Woodpark Poll

## DEFINITIONS

### Micron

The average fibre diameter of a wool sample.

### SD – Standard Deviation

Measures in microns the degree of variation of where fibres lie either side of the mean fibre diameter.

### CV – Coefficient of Variation

This result measures SD as a percentage of average micron.

### CF

Measure of the percentage of fibres less than 30 micron.

### YWT – Yearling weight

Estimates the genetic difference between animals as yearlings, for weight.

### EMD – Eye Muscle Depth (mm)

EMD ASBVs estimate the genetic difference between animals in eye muscle depth at the 'C' site.

### YFD – Yearling Fibre Diameter

Estimate of the genetic difference in fibre diameter clean fleece weight as a yearling.  
Rams with more negative YFD ASBVs are forecast to produce progeny which have finer wool.

### YCFW – Yearling Clean Fleece Weight

Estimate of the genetic difference in clean fleece weight as a yearling.

Rams with higher YCFW ASBVs are forecast to produce progeny which will cut more wool.

### MP – Merino Production Index

The Merino Production (MP) indexes rank animals on their ability to produce progeny for producers whose sheep income is a balance of both wool and surplus sheep sales. The MP index is calculated using CFW, FD, BWT and CV.

### DP – Dual Purpose Index

The Dual Purpose (DP) indexes rank animals on their ability to produce merinos for a dual purpose operation. These indexes are aimed at those producers whose majority of sheep income comes from sheep sales. The DP index is calculated using CFW, FD, BWT and CV.
